Registration Statement on Form F-1

Capitalization, page 78

The number of Class A 1. ordinary shares outstanding on a pro forma basis appears to include the 5,667,164 options that were early exercised in August. Considering such shares are still subject to vesting conditions, and as you state in your revised disclosures the early exercise of such options was not considered substantive, please explain further how you determined that inclusion of such shares in total outstanding pro forma shares is appropriate. Alternatively, consider including a footnote to the table explaining the exclusion of such

shares from the pro forma totals.

Note 11. Share-based Payments, page F-65

3. You indicate here that 24,000 units granted in September 2019 are subject to accelerated

vesting upon completion of an IPO; however, on page F-38, you disclose that 193,000

units granted in September 2019 are subject to accelerated vesting. Please explain this

apparent inconsistency or revise your disclosures accordingly.

4. In response to prior comment 3, you attribute the increase in the value of the Class  $\ensuremath{\mathsf{B}}$ 

Units from \$17.26 in September 2019 to \$125.74 in May 2020 to the increase in the value

of the company's ordinary shares and the change in the distribution percentages between  $% \left( 1\right) =\left( 1\right) +\left( 1\right) +\left($ 

Class B Unit holders and Common Unit holders in BCPE Bridge Cayman

("BCPE Bridge"). Please explain to us why your analysis focuses only on the increase in  $\,$ 

the value of the company's ordinary shares held by BCPE Bridge. Tell us whether  $\ensuremath{\mathsf{BCPE}}$ 

Bridge holds other assets, and, if so, how those were considered in determining the value  $% \left( 1\right) =\left( 1\right) +\left( 1\right) +$ 

of BCPE Bridge's Class B Units. Also, tell us the distribution percentages for the Class B  $\,$ 

Unit and Common Unit holders as of September 2019 and May 2020. Note 17. Subsequent Events, page F-68

5. Please revise to disclose the value of the 5,666,354 options granted in September 2020 as

 $\dot{}$  well as the amount of share-based compensation expense that will be recognized for the

options that are subject to accelerated vesting upon completion of the IPO. Also, tell us

 $% \left( 1\right) =\left( 1\right) \left( 1\right)$  the value of the underlying ordinary shares used to value these options and to the extent

there was any significant fluctuation in the fair value from prior grants, please describe for

us the factors that contributed to such fluctuations including any intervening events within

the company or changes in your valuation assumptions or methodology. General

automatically convert into Class A ordinary shares five years from the date of this  $\ensuremath{\mathsf{A}}$

factor disclosure of the dilution to holders of Class A ordinary shares, the relative increase

in the voting power of Mr. Jing Ju and the potential loss of "controlled company" status  $% \left( 1\right) =\left( 1\right) \left( 1\right) +\left( 1\right) \left( 1\right) \left( 1\right) +\left( 1\right) \left( 1$
